

Heat reflecting gold foil

Heat reflective material used in automobile racing industries. Excellent heat reflective characteristics and easy to install. Withstands 360°C of radiant heat for a minimum of 8 hours. Sold in meters.

SOBEK part number: N-S 9009 0134

Form:

- Metalized polyamide film laminated to glass cloth with high-temperature acrylic adhesive protected by a release liner
- Color: Gold
- Lightweight: 170 g/m²
- Forms to any shape
- Width 155 mm, thickness 0,16 mm

Function:

- Capable of reflecting 78 % of all radiant heat with continuous operating temperatures of 450°C.
- Minimum air gap to heat source: 1 mm
- Easy to apply and remove with MEK, toluene or gasoline
- Shelf life: 1 year when stored under conditions of 21 °C an 50% R.H.

Fit:

- Engine covers
- Side pods
- Suspension
- Under trays/floors
- Seat bottoms
- Fire walls and bulkheads
